

PROTECTIVE MASKS

FOR THE PREVENTION OF THE SPREAD OF COVID-19

“WE RECOMMEND THE WIDESPREAD USE OF CLOTH MASKS.
...THERE SHOULDN'T BE A NEED FOR EVERYONE
TO BE WEARING SURGICAL/N95 MASKS”

South African Health Minister, Zweli Mkhize

PROUDLY MANUFACTURED IN SOUTH AFRICA

KARMA

CORPORATE WEAR

DEPARTMENT OF HEALTH ON COVID-19

The National Department of Health has recommended that **South Africans should wear CLOTH face masks** when in public to prevent the spread of COVID-19.

The National Department of Health recommends that:

Everyone should wear **CLOTH face masks** when in public.

Members of the public should not use N-95 and surgical masks; **medical masks remain reserved only for healthcare workers.**

Handwashing and social distancing still remain the most important prevention strategies for COVID-19

Why must I use a cloth face mask when going out in public?

The main benefit of everyone wearing a face mask is to **reduce the amount of Coronavirus or Influenza virus droplets being coughed up by those with the infection.** Since some persons with the Coronavirus may not have symptoms or may not know they have it, everyone should wear a face mask.

How to use a cloth face mask:

- The face mask must cover the nose and mouth completely.
- Face masks should not be lowered when speaking, coughing or sneezing.
- Face masks should not be repeatedly touched – fidgeting with the mask repeatedly is strongly discouraged.
- The inner side of the mask should not be touched by hands.
- Wash hands after removing the face mask.
- Wash cloth face masks with warm soapy water and iron when dry.
- Each person will need to have at least 2 face masks so that one face mask is available when the other is being washed.

3PLY NONWOVEN DISPOSABLE MASK

SPECIFICATION

- Quad pleat design shaped for all size faces
- Outer layers spun bond nonwoven 20gsm
- Inner layer filter spun bond 70gsm
- Maintains breathability
